

Oranka

ORANKA brand quality.
Naturally healthy with vitamin C.

Brand quality in a beverage system.

The ORANKA juice beverages with vitamin C (1+19) are our recommendation for a healthy liquid supply, since the low osmolarity causes them to be quickly absorbed by the body and because they do not contain added sugar. The juice content within the ready-to-drink beverage is 20%, out of which 2% are natural sugar. Already 200 ml of the ready-to-drink beverage cover 50% of the recommended daily intake of vitamin C. The fruity taste and the quality of ORANKA brand beverages encourage drinking – this is how they make a valuable contribution to a healthy diet. The ORANKA juice beverages are, of course, **also suitable for diabetics**.

ORANKA juice beverages and Ice-Tea with vitamin C (1+19), as well as ORANKA juice beverages with zinc and vitamin C (1+19), are available in a large variety of flavours. Thus, there is a beverage for every taste and need. Regardless of your choice, **just one glass with 200 ml ready-to-drink beverage covers 50% of the daily vitamin C requirement**.

The following scientific findings apply, in accordance with the European health claims directive (EG 1924/2006), to vitamin C.

- Vitamin C contributes to the normal function of the immune system.
- Vitamin C contributes to the normal bone function.
- Vitamin C contributes to the normal cartilage function.
- Vitamin C contributes to the normal function of the gums.
- Vitamin C contributes to the normal collagen development and function of the skin.
- Vitamin C contributes to the normal function of blood cells.
- Vitamin C contributes to the normal production of energy.
- Vitamin C contributes to the normal function of the nervous system.
- Vitamin C contributes to the protection of cell components against oxidative damage.

Natural, healthy and tasty. That is ORANKA: a functional refreshment beverage with 20% juice content and the additional health benefit through a plus of vitamin C.

ORANKA brand quality. Naturally healthy with vitamin C.
